- English
- HIndi

PROFESSIONAL EXPERIENCE

Software engineer

Chetu india pvt ltd february-august
- I have 7 month experience in HTML,CSS, BOOTSTRAP, JAVASCRIPT, React JS.

- **Ens Enterprises pvt ltd** september - present

Project

- **Food delivery application**
  Developed a dynamic single-page application (SPA) for a food delivery service using React.js, HTML, CSS, and JavaScript. This project features a user-friendly interface where customers can easily filter food items based on categories, ensuring a seamless browsing experience. The application includes a bookmarking system, allowing users to save their favorite dishes for quick access. Additionally, the project incorporates comprehensive form handling to manage user inputs efficiently. Leveraged React's Context API for state management, enabling efficient data sharing across components and enhancing overall application performance. This project demonstrates strong front-end development skills and a solid understanding of modern web technologies.

- **Savage Seller**

  Designing a dashboard involves creating a user-friendly interface that clearly presents key data and insights. Focus on understanding user needs, prioritizing essential metrics, and using effective visuals. Ensure interactivity with filters and responsive design for different devices. Gather user feedback for continuous improvement, resulting in a powerful tool for informed decision-making.
